DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 and 16-34 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

In the claims the limitation of a portal allowing a user to draft a patent application and to check for conformance with patent examining rules, wherein the portal includes an expert system that guides the user through each step of preparing the patent application, and when a communication from a patent office is received, the expert system guides the user to respond to the communication, is not enabled by the specification. Applicant is requested to show support for this amendment.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 16-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the claims, a portal allowing a user to draft a patent application and to check for conformance with patent examining rules is vague and indefinite with respect to what is meant by checking for conformance. What rules is the applicant referring to?

In the claims an expert system that guides the user through each step of preparing the patent application is vague and indefinite with respect to the guidance process.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1 and 16-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Riordan in view of Official Notice.

The reference was discussed in the previous office action. As to the applicant's amendments:

It would have been obvious for one skilled in the art at the time to have guided and checked the application for at least one claim as checking applicants for compliance is routine to those skilled in the art.

Moreover, it would have been obvious for one skilled in the art to have alerted the applicant that Office action has been issued, as notification systems are known to those skilled in the art.
